

CSI AGORA

A few weeks ago an extremely valuable invention disappeared from one of Agora's labs. After many years of secret research and development this device has become capable of the unthinkable: it can turn any material into gold. If the public became aware of its existence, catastrophic consequences would occur. Further, news of its disappearance would attract thousands of self-proclaimed treasure hunters. This cannot happen; the investigation must be carried out in the utmost secrecy!

Despite the staff of Agora tried to conceal the existence of the invention by taking the strictest precautions, the machine disappeared. It is quite worrying that the security camera recordings have also been lost, and the detective the case was assigned to is missing. Róbert Sárosi, who is the head of the Special Department of Debrecen Police Station, has been out of reach for two days; no one knows where he is. All the evidence gathered so far are in his possession, only one document was found in the pocket of his jacket left in the office: a list of the people who had access to the camera footage on the day of the crime. Help reveal the perpetrator; time is working against us!

Scan the QR code and let the investigation begin at the Foucault pendulum, in the interactive space.

Armand Kovács dr.
age: 36
height: 182 cm
blood type: B+

Valéria Szepesi
